Script Name:

Advance data

Script Type:

Slider

Overview

This script is purely for distributors only and is designed for demonstration purposes. Whenever you have a demonstration to present to a customer, we designed a database and a script where you can just run a script and have it populate data with up-to-date information. All designed to be a time saver. Only compatible with the demo database found on www.timeware.org/downloads

Dependencies

- The demo database found on www.timeware.org/downloads

Operation Example

- Run the script and be presented with up-to-date information so you can demonstrate.

Configuration

- Run via the script editor.
- Requires the SQL password on the SQL_PASSWORD line.
- May take several minutes to run.
