Legacy Devices...

Message from Customer Care

"Our records show your company still relies on legacy hardware. Let us demonstrate **Suprema's latest proximity and biometric devices**, offering speed, security, and trusted performance.

The BioStation 3 supports PoE+ for enhanced power delivery, while the X-Station 2 operates with standard PoE, ensuring flexible installation. We'll show you how easy it is to **upgrade to the latest technology** and ensure your workforce management is future-proof."

Charlotte Kavanagh
Head of Customer Care.

"During a presentation, we'll advise which technology best suits your company. Through a remote Teams session in our AV room, we'll demonstrate each device.

The BioStation 3, our preferred device, leads with non-contact **facial authentication**. **The X-Station 2 (Fingerprint)** offers precise, contact, biometrics, while the **X-Station 2 (Prox)** supports RFID fobs. Upgrading from legacy hardware boosts workforce confidence, showing employees a modern, efficient system.

Please see below a QR code leading to a video highlighting speed comparison. Let timeware® guide you toward a future-ready, workforce-empowering solution."

Charlotte Kavanagh
Head of Customer Care.
